

WATER LESS®

The Power to Reduce Expenses

Concerned about maintenance expenses? The WATER LESS® battery is our preferred solution for customers looking to reduce watering problems and expenses without sacrificing run time or cycle life. Requiring watering just four times per year in normal applications, WATER LESS® combines the benefit of full power and reduced cost.

- Valve-regulated ('sealed') products, while being environmentally friendly, can cost you extra dollars in terms of lost capacity, reduced cycle life and higher initial cost. They also require a special charger. WATER LESS® on the other hand, reduces maintenance expenses over 90% while maintaining full capacity and long cycle life. The WATER LESS® battery does not require a special charger.

- When compared to a standard battery, WATER LESS® saves you time and money. Less watering, less labor, and less room for watering error.

Reduced Expenses

Reduced maintenance means less watering, reduced expenses and no special charger required.

- Less Watering - The WATER LESS® battery starts gassing early and due to better charge acceptance does not gas as heavy to mix the acid with electrolyte. This means that WATER LESS® only needs to be watered only four to six times per year.

- No Special Charger - May be charged on a standard charger - no special requirements or special charger needed.

- Maintenance Plan - WATER LESS® can help get you out of the maintenance business. Your HAWKER dealer can set up a comprehensive programmed maintenance agreement including watering your batteries. This offers you a "no maintenance" battery option.

Reduced Maintenance

By using proprietary grid metallurgy, the HAWKER WATER LESS® battery requires watering only four to six times per year. Less watering. Less room for error.

WATER LESS® At a Glance

A powerful solution, WATER LESS® batteries:

- Save Maintenance Dollars
- Deliver Full Capacity and Performance
- Do Not Require a Special Charger
- Do Not Require Additional Counterweight
- Can Be Maintained on a Quarterly PM Program

When tied to a preventative maintenance program, WATER LESS® can become "maintenance free" without the drawbacks.

Solid Performance

No need to sacrifice performance for reduced maintenance. WATER LESS® provides the full performance of a flooded battery.

- Full Capacity - The WATER LESS® battery offers full 85, 100 and 125 AH capacities.

- Long Life - The WATER LESS® battery maintains an estimated cycle life of 1500-2000 cycles, based on one cycle per day and 80% DOD.

- Application - The WATER LESS® battery can be used in medium and heavy applications.
